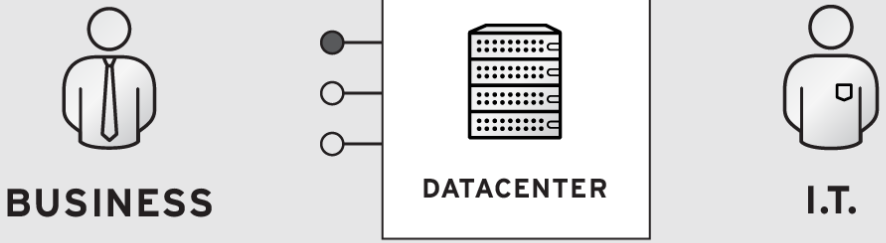
Стек продуктов Red Hat: от операционной системы до гетерогенного облака

Андрей Маркелов,
Системный архитектор
Red Hat
11 апреля 2014 г.

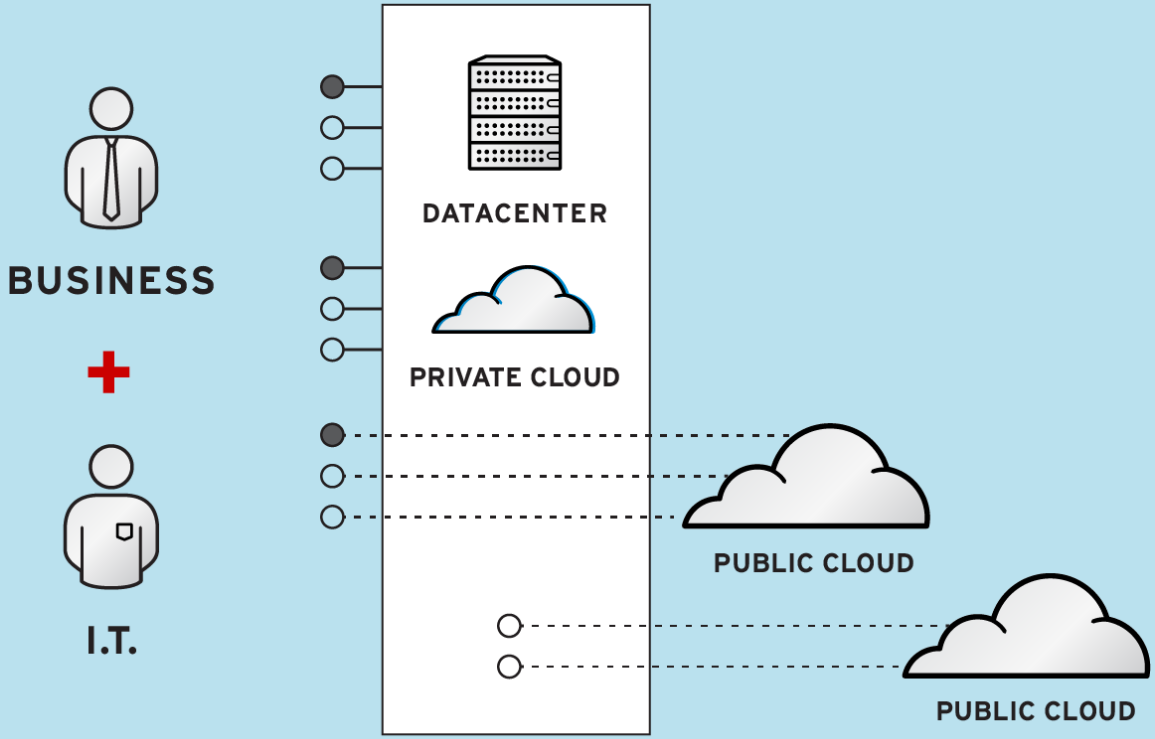
THE ROLE OF I.T. IS CHANGING

From service provider to strategic partner



TRADITIONAL I.T.

- Provides services on traditional infrastructure

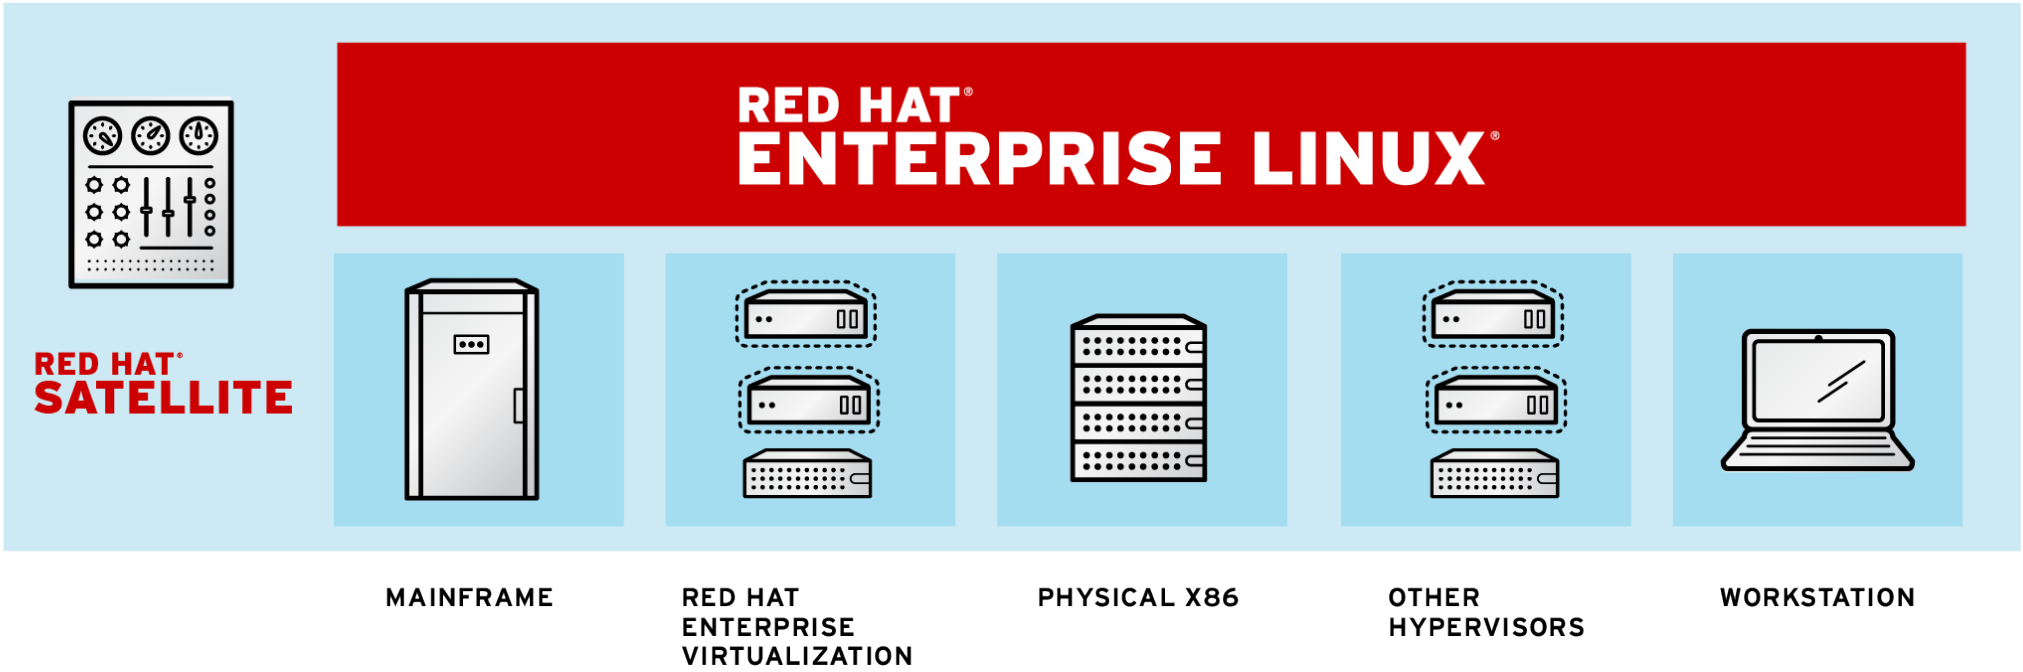


HYBRID I.T.

- Provides services on traditional infrastructure
- Provides services on private cloud
- Brokers services from public clouds
- Consumes services from public clouds

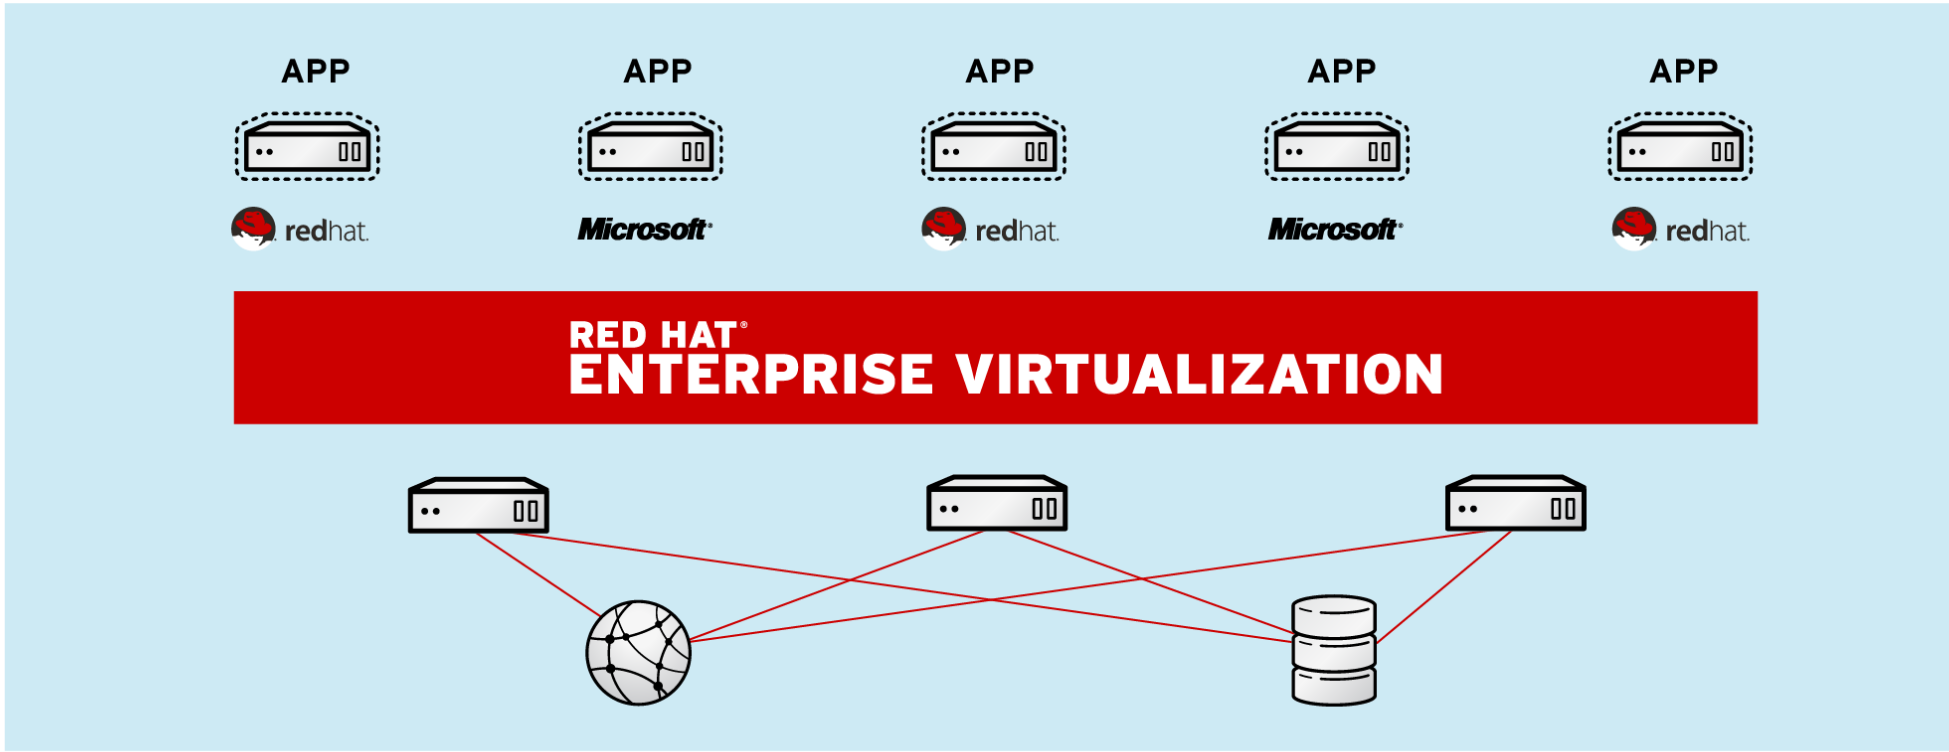
AN OPEN HERITAGE

Red Hat Enterprise Linux and Red Hat Satellite



RED HAT ENTERPRISE VIRTUALIZATION

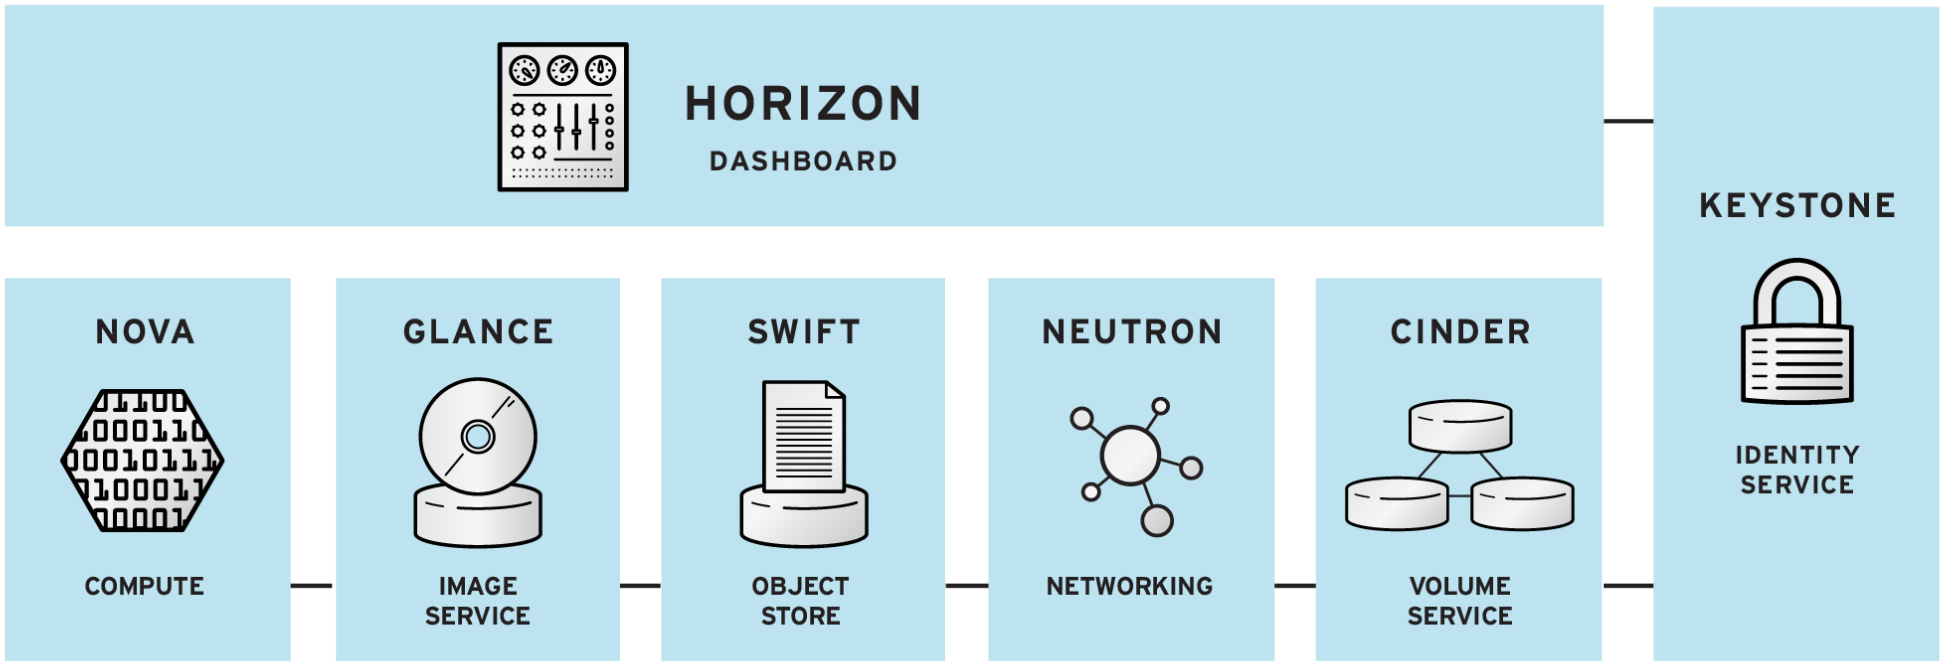
Virtual infrastructure solution for traditional workloads



- Leading performance
- Cost-effective
- Enterprise-ready
- Open and interoperable
- Cross-platform

RED HAT ENTERPRISE LINUX OPENSTACK PLATFORM

Cloud infrastructure solution for next generation workloads



- Modular architecture
- Designed for scale out
- Based on a set of core shared services
- Flexible networking models
- Redundant scalable storage
- Dashboard for self-service

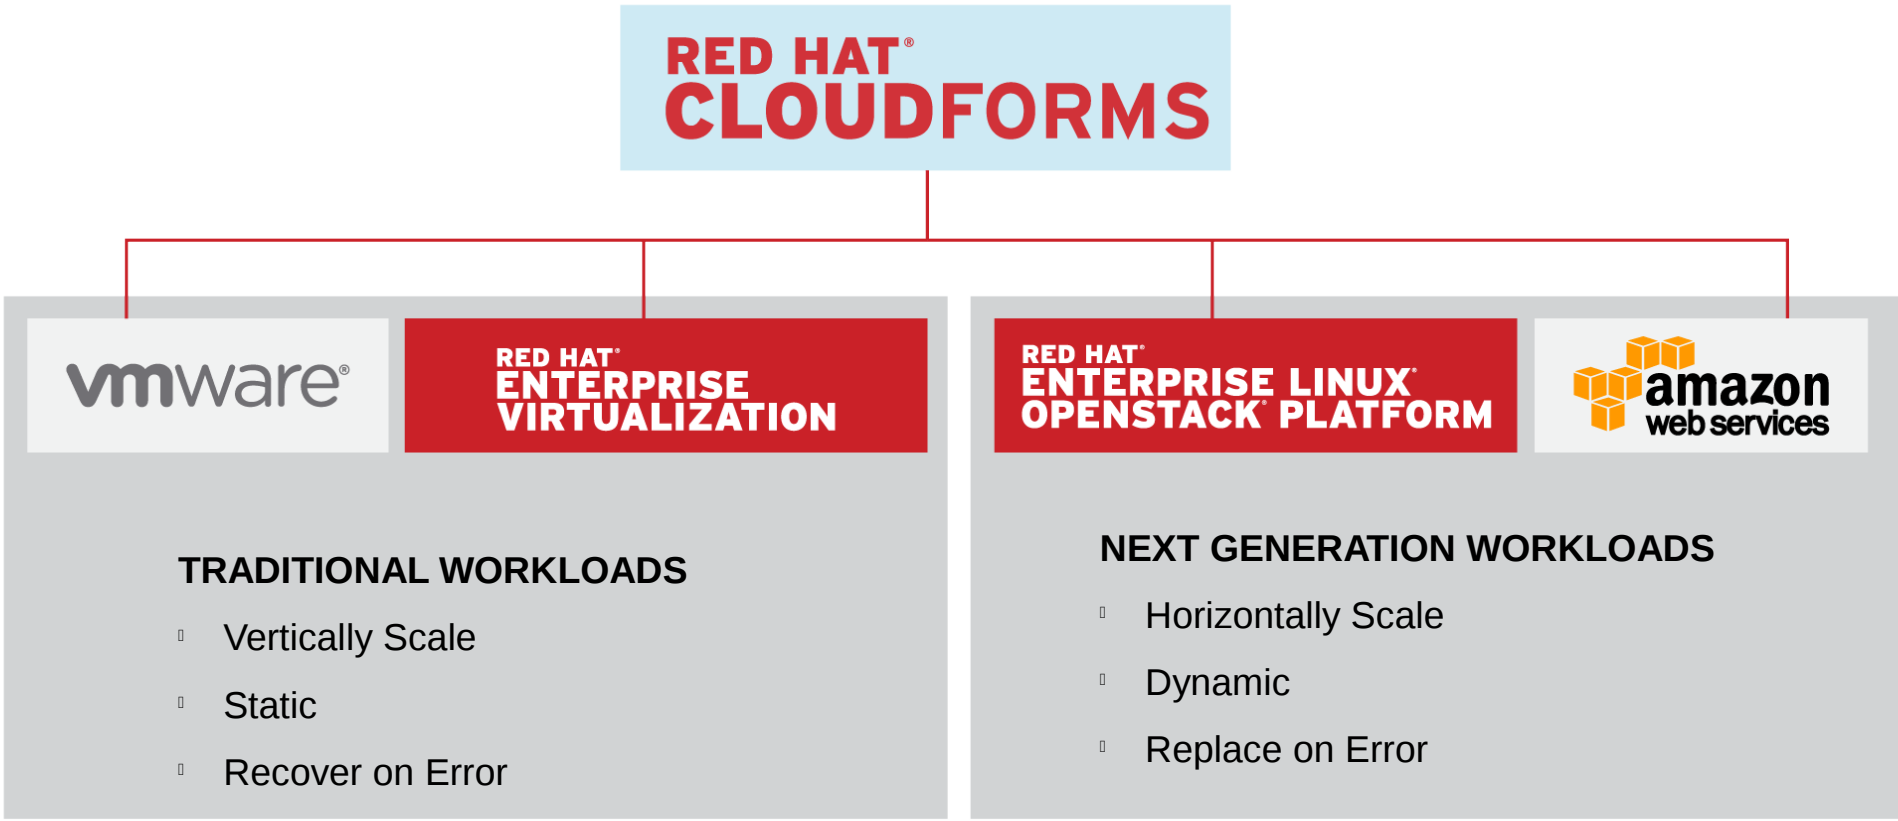
RED HAT CLOUDFORMS

Open hybrid cloud operations management solution

- Agent-free virtual appliance
- Operations and admin self-service
- Enterprise directory support
- Multi-tenancy support
- Horizontal scalability
- Load balancing failover/failback
- Manage multiple locations
- Unified operations management

RED HAT CLOUD INFRASTRUCTURE

Virtualization to private cloud



RED HAT CLOUD INFRASTRUCTURE

Foundational infrastructure for the open hybrid cloud

RED HAT® CLOUDFORMS

HYBRID CLOUD MANAGEMENT

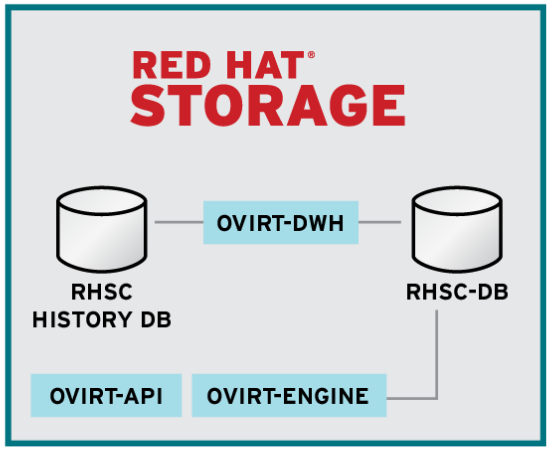
RED HAT® ENTERPRISE VIRTUALIZATION

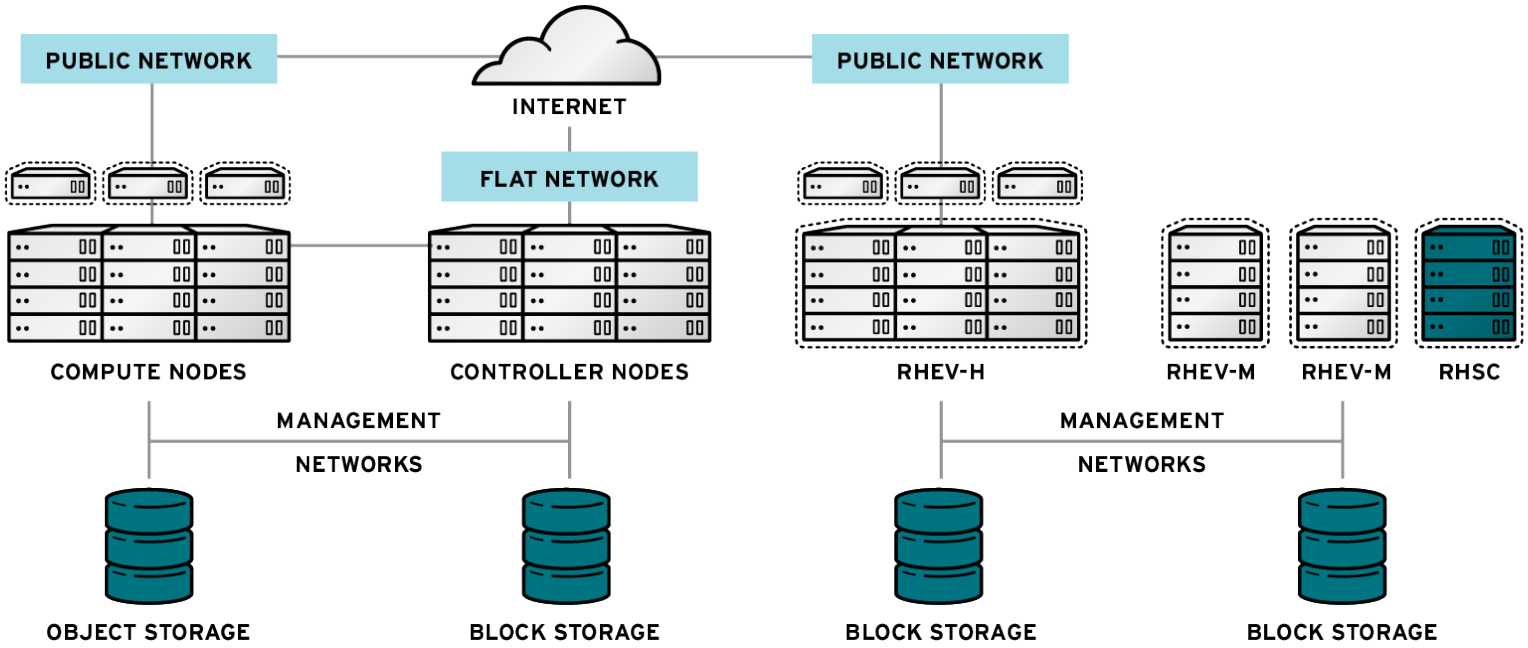
TRADITIONAL WORKLOADS

RED HAT® ENTERPRISE LINUX® OPENSTACK® PLATFORM

CLOUD WORKLOADS

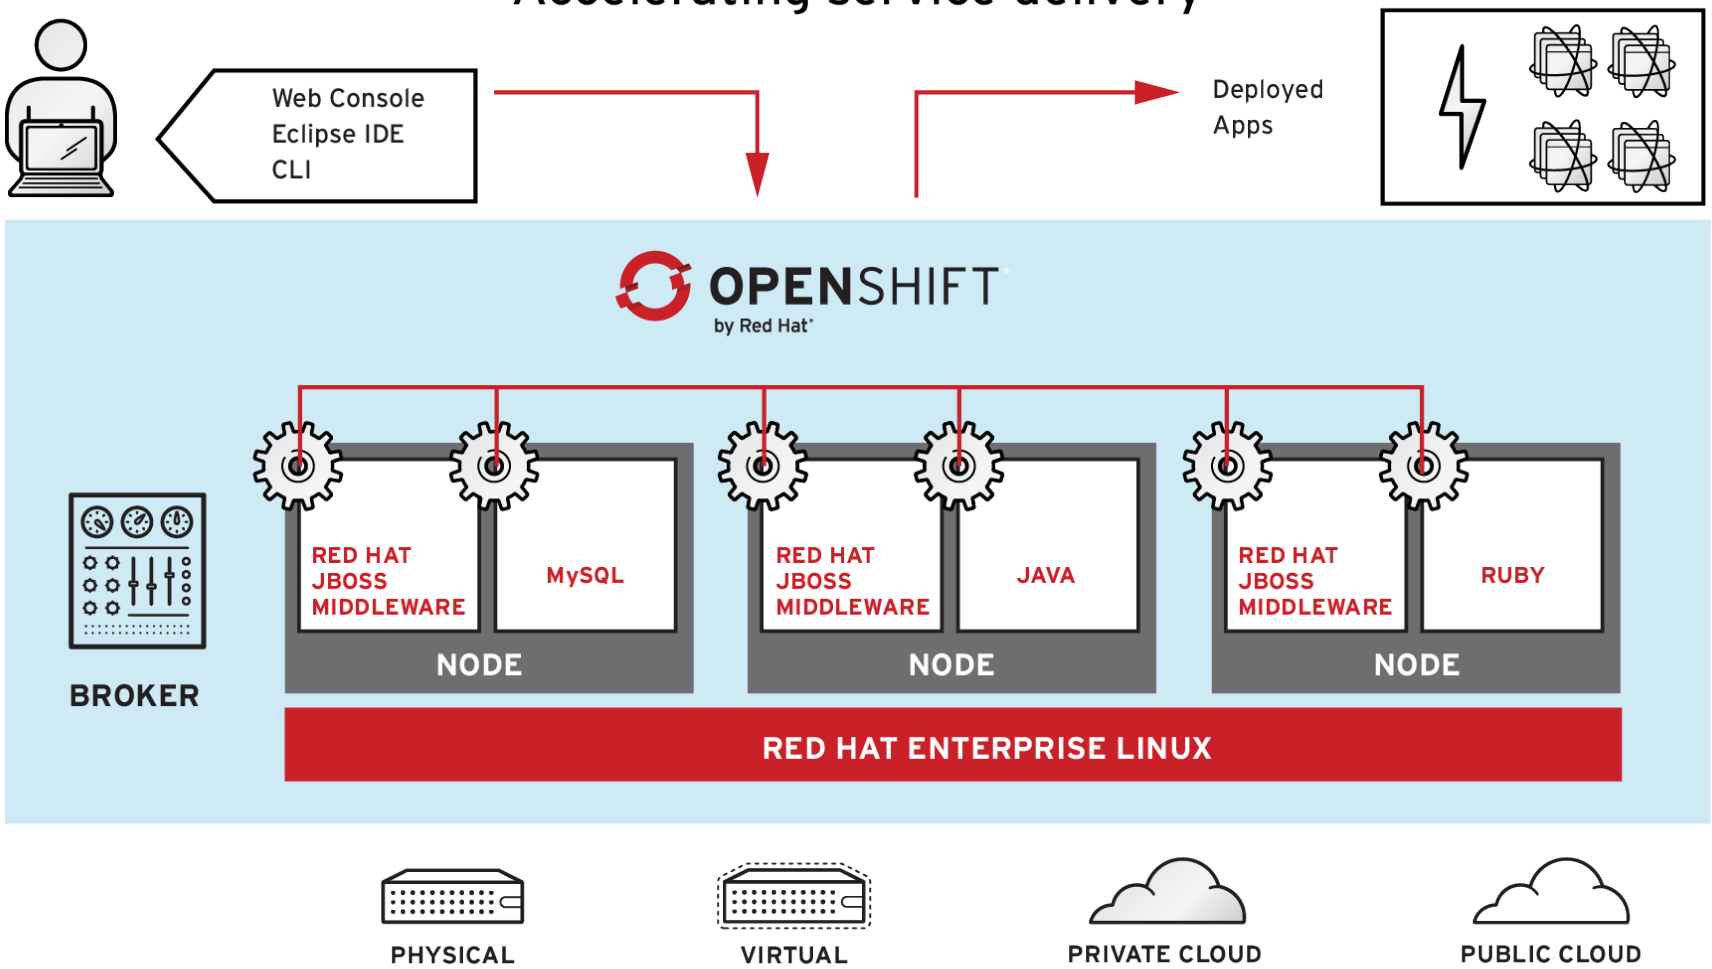
RED HAT STORAGE





OPENSHIFT BY RED HAT

Accelerating service delivery



- Increase resource utilization beyond virtualization
- Automated provisioning of applications
- Standardize containers
- Automatic scaling

CLOUD APPLICATIONS AND WORKLOADS

Build and manage applications in the open hybrid cloud
